

WHAT KOLLGUARD DOES

Continuous compliance for the AI era.

SOC 2, HIPAA, ISO 27001, CMMC and FedRAMP evidence that collects itself, across your code, cloud, databases, vendors and AI agents. Findings become pull requests. Proof becomes a live Trust Center instead of a stale PDF.

BUILT FOR THREE TEAMS

ENTERPRISE IT & GRC

Run third-party risk continuously

Assess every vendor against one standard question set, gate onboarding on status, keep every BAA, DPA, MSA and NDA current, and inventory every AI agent your vendors and teams run.

VENDORS & STARTUPS

Close enterprise deals without the scramble

Scan repos, cloud and databases against SOC 2 and HIPAA controls, fix findings as pull requests, and answer any security questionnaire from live posture in a day.

FEDERAL SUPPLIERS

CMMC Level 2 and FedRAMP readiness

All 110 NIST 800-171 requirements with a live SPRS score, POA&M eligibility, SSP exports, FedRAMP Rev 5 baselines, and flow-down checks across your subcontractors.

HOW IT WORKS connect once, stay audit-ready every day

1

Connect

GitHub, AWS, Supabase and Postgres, your vendor register and the AI agents in your stack. Read-only where possible; nothing to install on endpoints.

2

Scan and map

Every finding lands on one of 196 monitored controls, mapped across 15+ frameworks, so a single fix moves SOC 2, HIPAA, ISO and NIST readiness at once.

3

Fix and collect

Sentinel opens pull requests for code findings. Policies, personnel, agreements and dispositioned findings accumulate as evidence over the period, not a snapshot.

4

Prove

A hash-chained audit log, evidence packages an auditor can open, and a public Trust Center that shortens the next questionnaire, or makes it disappear.

196

monitored controls, one mapping for every framework you answer to

15+

frameworks: SOC 2, HIPAA, HITRUST, ISO 27001, NIST 800-53, PCI, CIS, EU AI Act, CMMC, FedRAMP

Same day

from a pasted 300-question questionnaire to reviewed, policy-cited answers

Free

first scan of a URL or repo you own, no sales call, results in minutes

Human in the loop, by design. KGAI drafts questionnaire answers, remediations and policies from your real posture, cites the governing policy for each, and carries a confidence rating. A person approves. A low-confidence answer never rounds up to "ready".

The whole compliance program, **one platform.**

SCAN

Compliance scans

Repos, cloud, databases and AI agents graded against SOC 2 and HIPAA controls, continuously.

FIX

Sentinel

Autonomous code review that turns findings into reviewable pull requests.

PROVE

Trust Center + evidence

Public posture page, evidence packages per framework, exports an auditor can open.

VENDORS

Vendor Risk (TPRM)

Standard question bank, readiness rings, criticality, onboarding gate, breach alerts and SOC 2 verification with Vendor Watch.

VENDORS

Nth-party chain

4th and 5th-party sub-processors, flow-down BAAs, and a portfolio report of who touches your data.

QUESTIONNAIRES

Issue and answer

Send one standard set to vendors; answer the ones customers send you from live posture, every answer policy-cited.

AGREEMENTS

BAA · DPA · MSA · NDA tracker

One register, executed documents attached, 30/14/7-day renewal reminders to the owner.

AI

AI Governance

Inventory every AI system, classify under ISO 42001, NIST AI RMF and the EU AI Act, write the autonomy policy.

AI

Agent Watch

Live monitor for AI agents in production with a mobile app on iOS and Android for the on-call human.

FEDERAL

CMMC & FedRAMP

110 NIST 800-171 requirements, SPRS score, POA&M, SSP/POA&M/SRM exports (incl. OSCAL), FedRAMP Rev 5 Low/Moderate/High baselines.

ASSURANCE

Pentest + provider marketplace

Pay-per-engagement pentests and a vetted network of independent audit and security firms; KollGuard makes the intro and handles payment.

RECORD

Hash-chained audit log

Append-only. Alter a record and the chain breaks and tells you where.

THE STANDARD WE HOLD OURSELVES TO

- ✓ **Server-enforced MFA** and passkeys for every account, SSO/SAML and SCIM on Enterprise.
- ✓ **AES-256 at rest with external KMS custody**, TLS in transit, US region.
- ✓ **Per-tenant row-level security** in the database, not just the application.
- ✓ **Every AI-written change** goes through the same governed review loop we sell.
- ✓ **BAA available.** Our own posture is public at kollguard.com/trust/kollguard.

PLANS

Free	First scan, free tools, a look at your real posture.
Starter	A founder or small team getting audit-ready.
Growth	Vendor risk, questionnaires, AI governance, CMMC and FedRAMP for a team.
Enterprise	SSO/SAML, SCIM, multi-tenant portfolio, priority support.
Per engagement	Pentests and the Questionnaire Deal Pass, no subscription needed.

Live pricing at kollguard.com/pricing.

START FREE

Scan a repo or URL you own

Graded report in minutes, mapped to SOC 2 and HIPAA controls. No sales call.
